Attached are the pdf's. Somehow the earlier versions were saved as adobe portfolios. These should be accessible with adobe reader.

UC, attached are several documents regarding the Overview Oiling Survey Assessment. There is a 'clean' version of the document if you want to read through the latest version. Also, there is a 'track changes' version which will allow you to see the adjustments we have made after taking the UC comments into consideration.

For the benefit of everyone we have also attached the comments received from USCG, CA DFW, SB County, and the RP (rep from C-K).

Between EUL and RP Environmental rep and myself we have taken the comments into account and feel that the OOSA document is ready for your final review and approval so we can begin this effort on **Thursday** (July 9th). If the teams are able to complete the sampling earlier than the four days which has been indicated in the OOSA, then the agencies can send their samples out sooner. As I understand it, the CA DFW sample analysis will be the primary document which will be completed with the intent of returning it first to the UC so the results can be released to the Stakeholders and Public.

Please review the appropriate document (clean or track changes) and reply with your approval if possible.

Thanks, Tom

Please see attached revisions to the Overview Oiling Survey Assessment. I attached a clean version and one with track changes. I also attached comments from the USCG, SB County, the RP, and the SOSC.

Please forward to the UC for review and comment.
